

Hot Products from Goo-Goo Baby

Every parent is going to need one of these. The Totspot (patent pending) is a portable LED light that will clip onto most items up to 1 inch thick such as clothing, baby's crib or change table, chairs, books, etc. It is constructed of a lightweight, durable material with a ball and socket style rotating head which pivots like an 'eye' in any direction enabling the user to direct the light accordingly. Our ergonomic design incorporates safety features such as a countersunk low voltage LED bulb, screw-on battery cover, secured clip and push-button on/off switch making the Totspot safe for your child to handle with supervision. The Totspot produces a significant amount of non-invasive light without creating night blindness. It can be used in a multitude of applications including: checking on babies and young children at night, administering medicine, reading a book, lighting the inside of a carry bag, illuminating a map in a vehicle or as a safety night light for the elderly, to name only a few. Perfect Pocket Bib

The Perfect Pocket Waterproof Bib is a must have for any parent

The patent pending mess-catching pocket is not your typical flat, "sewn in place" pocket. In fact, it can be unsnapped and laid flat so that you can quickly wipe it clean and then snap it back up again ready for use.

What's more, when fastened the pocket is specially designed to bow away from baby staying open and therefore catching and retaining up to 1/2 cup of food and liquid!

Say good-bye to rusty metal fasteners and sharp Velcro as our bibs come with comfortable and adjustable plastic neck fasteners.

Perfect Pocket Bib - \$19.99 CAD

The Perfect Pocket Waterproof Bib comes in two sizes: 6-24 months (small) and 2-4 years (large).
